

## Myanmar

### **Session III National Legislation and Regulation**

- In Myanmar, holding of firearms is strictly controlled by the state. The supervisory committee for holding of firearms, chaired by the minister for Home Affairs scrutinizes the issuances of firearms in accordance with the Regulation on Holding of Firearms, 1997.
- Firearms brokering is not the case in Myanmar like other countries in the region. Myanmar has no specific legislation on arms brokering. In practice licensing or authorization of brokering transactions is prohibited. To take necessary action against illicit trafficking and brokering in weapons and explosives, the domestic laws have been put in place in the country.
